Summary

Results-driven Data Scientist and AI Developer with 3.5+ years of experience delivering end-to-end Machine Learning, Generative AI, LLM, NLP, Computer Vision, and Agentic AI solutions. Strong expertise in Python, SQL, LangChain, LangGraph, RAG, and AI agent development, with a proven ability to transform complex business requirements into scalable, production-ready AI solutions that drive automation, efficiency, and data-driven decision-making.

Experience

Dexpro Innovation, Data Scientist and AI Developer — Trivandrum, Kerala — Jan 2025 – Present

- Developed and deployed predictive machine learning models using TensorFlow, PyTorch, and Scikit-learn, leveraging NVIDIA GPU acceleration and CUDA to optimize model training and inference performance, supporting data-driven business strategies and decision-making.
- Implemented custom Large Language Model (LLM) workflows using Hugging Face Transformers for domain-specific tasks, including fine-tuning and prompt engineering ensuring seamless integration with business applications.
- Designed and developed intelligent chatbots using frameworks like LangChain, Rasa, and Flask, integrating with OpenAI GPT APIs for natural language understanding and response generation

Futuralabs, Data Scientist and AI Developer — Calicut, Kerala — Sep 2023 – Dec 2024

- Fine-tuned pre-trained language models (LLMs) using domain-specific data to improve performance on custom NLP tasks.
- Developed WhatsApp and web-based bots using Twilio API and Streamlit/Gradio interfaces for real-time user interaction and automation
- Developed Computer Vision solutions for image-based applications using OpenCV, TensorFlow, and PyTorch, implementing image preprocessing, feature extraction, image classification, and object detection techniques.
- Deployed models and applications on cloud platforms such as AWS EC2, Google Colab, and Render for scalable and reliable access.

Techolas Technologies, Data Scientist Intern — Calicut, Kerala — Oct 2022 – Apr 2023

- Cleaned, transformed, and structured raw data for analysis.
- Participated in fine-tuning Large Language Models (LLMs) with domain-specific datasets to improve chatbot accuracy and relevance.
- Worked closely with senior data scientists on real-world business problems.

Education

Diploma in Data Science
Techolas Technologies — **Calicut, Kerala** — *2022 – 2023*

Bachelor of Physics
University of Calicut — **Malappuram, Kerala** — *2019 – 2022*

Projects

Agentic AI Assistant for Learning Institute — 2026

- Built an AI-based enquiry management system for educational services.
- Designed workflows to collect and process admission-related queries.
- Implemented AI-driven conversational responses for course information and support.

- Improved student engagement and reduced manual support workload.
- Created centralized monitoring of enquiries from multiple communication channels.
- Tools and technologies: Python, Langchain, API's

AI-Powered Trading Simulation Platform 2026

- Designed and developed an Agentic AI-powered trading ecosystem using CrewAI with autonomous agents simulating a full engineering team
- Implemented simulated trade APIs to execute dynamic trading strategies and validate system functionality.
- Planned future extensions: integration with live market data and reinforcement learning-based strategies.

Malayalam Voice Assistant — Regional Language Support Agent s 2026

- Built a voice and text-based AI agent capable of understanding and responding in Malayalam and code-mixed Malayalam-English (Manglish) to serve non-English-speaking users..
- Fine-tuned a multilingual LLM (IndicBERT/Llama-based) on domain-specific Malayalam datasets to improve intent recognition and response accuracy for low-resource language queries.
- Integrated Whisper for Malayalam speech-to-text and a regional TTS engine for real-time voice-based interaction.

Enterprise AI Operating System - Python, LangGraph, LangChain, LLMs, RAG 2026

- Develop an enterprise-grade AI platform using multi-agent architecture to automate complex business workflows and decision-making
- Implement AI agents with LangGraph and LangChain for task planning, orchestration, tool usage, and autonomous execution
- Integrate LLMs, RAG, vector databases, and enterprise data sources to provide context-aware and reliable AI responses.

AI-powered Interview Assistant - AutoGen 2025

- Designed an Interviewer Agent to generate dynamic technical, behavioural, and situational questions. Built a Candidate Agent capable of producing realistic, role-specific responses.
- Implemented an Evaluator Agent to score answers and provide automated feedback.
- Integrated agents to simulate a realistic interview environment for job seekers and HR teams.

Skills

Soft Skills: Problem Solving, Critical Thinking, Analytical Thinking, Communication, Team Collaboration, Decision Making

Programming Languages: Python, R,SQL

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Vector Databases (chromaDB, Faiss)

AI and Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, RAG, Prompt Engineering, Fine-Tuning, Embeddings, NVIDIA Technologies (CUDA, TensorRT, GPUs)

Agentic AI: LangChain, LangGraph, CrewAI, AutoGen, AI Agents, Multi-Agent Systems, Agent Orchestration, Tool Calling, Function Calling, N8n, SDK

Frameworks and Libraries: Scikit-learn, TensorFlow, Keras, PyTorch, Pandas, NumPy, OpenCV, Hugging Face, Rasa, Dialogflow

Generative AI and LLM Tools: OpenAI, Gemini, Groq, Hugging Face, LangSmith, LLM APIs, Vector Search

Web and API Development: FastAPI, Flask, REST APIs, Streamlit, Gradio

Data Analytics and Visualization: Power BI, Tableau, Excel, DAX, Power Query, Matplotlib, Seaborn, Plotly, Grafana

Cloud and DevOps: AWS, Azure, Docker, Git, GitHub, CI/CD

Project Management Methodology: Agile, Scrum, Kanban, DevOps
